#### Steps to be taken for maintaining Safety / Advices to the Puja Organisers

- While erecting pandals, please take care to avoid obstructing transformers and pillar boxes. Also ensure that pandal superstructures do not come in contact with overhead power lines.
- Please take authorized supply connection considering safety of you and your family.
- All wiring installations must be done by Govt. Licensed Electrical Contractor.
- Please use new wire/cable inside Pandal and use connector at the joints.
- Keep the Puja Pandal at a safe distance of at least 2.13 metres from overhead mains.
- Keep the Distribution Pillar Box free and accessible.
- Use correct size of cable as per load. Use 7/20 copper cable for Main Line.
- Use 3/20 copper for other wiring.
- Connect earth wire at the distribution boards.
- Keep distribution board at a safe distance from pandal and use Circuit Breaker with the Main Switches.
- If, more than one form is necessary for temporary supply for Puja then, consent of Police Station on any of the forms will be in order.
